

Parvez Shaik

Salesforce Developer

+1 (930) 904-4515 | parvezshaik3008@gmail.com | Portfolio | linkedin.com | github.com | salesforce.com/trailblazer

Professional Summary

Salesforce developer with **5+ years of experience** across CRM development, integrations, deployments and production support. I have worked in enterprise Salesforce environments at **IBM** and **Snowflake**, including platforms used by thousands of users. My work has covered **Apex, Lightning Web Components, Salesforce Flows, REST integrations, Gearset releases, legacy Visualforce modernization, case automation** and **integration troubleshooting**. Collaborates closely with developers, administrators, QA teams and stakeholders to resolve challenges, improve workflows and strengthen platform reliability. Brings strong ownership, practical problem solving and cross-functional collaboration to high-impact Salesforce initiatives.

Technical Skills

Salesforce Platform: Sales Cloud, Service Cloud, Lightning Experience, Agentforce, Data Cloud, Einstein Trust Layer, Reports, Dashboards

Development & Automation: Apex, Apex Triggers, Batch Apex, Queueable Apex, Scheduled Apex, Lightning Web Components (LWC), Aura, Visualforce, SOQL, Salesforce Flow, Platform Events, Custom Metadata Types, Validation Rules

Integrations & APIs: REST APIs, HTTP Callouts, Named Credentials, OAuth 2.0, External System Integrations, ERP Integrations, Payment Gateway Integrations, JSON, Error Handling, Retry Logic, Integration Logging

DevOps & Testing: Gearset, Git, Salesforce DX, CI/CD, Metadata Deployments, Apex Test Classes, Deployment Validation, Sandbox Management, Rollback Planning, Post-Deployment Validation

Architecture & Security: Event-Driven Architecture, Asynchronous Apex, Bulkification, Governor Limit Optimization, Performance Tuning, Profiles, Permission Sets, Role Hierarchy, Sharing Rules, Object-Level Security

Business Analysis & Delivery: Requirements Gathering, User Stories, Acceptance Criteria, Gap Analysis, Process Mapping, UAT, Defect Triage, Stakeholder Coordination, Requirements Traceability, Release Management, Agile/Scrum

Experience

Salesforce Developer, Snowflake | Chicago, USA

Jun 2025 - Present

- Reduced Salesforce release rework by 18% by governing GTM application deployments through Gearset, Git, Salesforce DX, CI/CD and reviewing Apex, LWC, Salesforce Flow, and Permission Sets metadata.
- Decreased repeat support tickets by 12% by resolving integration failures across Salesforce, cloud-hosted services, and REST APIs through HTTP-response analysis, authentication troubleshooting, Error Handling, Retry Logic, and Integration Logging.
- Cut release-review time by 28%, from 90 to 65 minutes, by standardizing Gearset deployment checks, automated Apex Test Classes, Salesforce Flow activation, and Deployment Validation procedures.
- Strengthen deployment readiness by supporting Sandbox Management, Deployment Validation, Rollback Planning, and Post-Deployment Validation activities while coordinating releases with Salesforce developers, QA engineers, business analysts, and GTM stakeholders.
- Enhance GTM workflow reliability by developing and optimizing Apex, LWC, Salesforce Flow, and SOQL logic supporting lead, account, opportunity, and customer-service processes.

CRM Business Systems Analyst, Kelley School of Business, IUB | Indiana, USA

Aug 2024 - Jun 2025

- Drove a 15% reduction in sprint-review clarification cycles through Requirements Gathering across admissions and student-support teams, converting CRM needs into User Stories, Acceptance Criteria, field updates, Reports, and UAT documentation.
- Accelerated workflow reviews by 10% by diagnosing recurring CRM support issues with Salesforce administrators and QA analysts and applying Gap Analysis to record-triggered Salesforce Flow, custom Reports, and Validation Rules.
- Cleaned duplicate records, missing fields, and reporting gaps, improving CRM data accuracy by 12%. Also helped admissions, support, Salesforce admins, and QA track UAT defects during Permission Sets updates

and Deployment Validation.

Senior Salesforce Developer, IBM | Bengaluru, India

Sep 2022 - Jun 2024

- Fixed performance bottlenecks for a global Salesforce CRM supporting 5,000+ users by tuning Apex and LWC components. Improved speed by 27% and reduced SLA breaches by 19.6%.
- Migrated 22 legacy Visualforce pages to LWC after reviewing support pain points and page load issues. Improved page load speed by 2.3 times and cut technical debt by 24.3%.
- Built case-handling automation with Salesforce Flow and Platform Events, reducing manual effort by 34% while maintaining 92% Apex test coverage.
- Worked with QA and deployment teams to stabilize Salesforce releases using Gearset, Git, and Salesforce DX. Reduced release related issues by 21%.

Salesforce Developer, Cognizant | Hyderabad, India

Jan 2021 - Sep 2022

- Built custom CRM workflows for 3,180 users using Apex, LWC, and Aura. These updates improved process efficiency by 27%.
- Integrated Salesforce with Payment Gateway Integrations, ERP Integrations, and marketing platforms through REST APIs. Reduced reconciliation time from an average of 3.1 hours to 2.6 hours.
- Moved delayed CRM updates into Batch Apex and Scheduled Apex jobs. Reduced manual follow up by 18% and improved scheduled data update reliability.
- Automated routine operations using Salesforce Flow, Process Builder, and Validation Rules. Manual data errors fell by 19% while SLA compliance rose by 14%.

Projects

CRM Case Automation & Release Stability ↗ | *Apex, LWC, Flows, Platform Events, Permission Sets, REST APIs*

- Built a case triage and escalation flow using LWC, Apex, Flows, and Platform Events. Reduced manual case review steps by 29% in test scenarios.
- Connected an external status service through REST APIs and showed case updates inside a custom LWC. Added validation checks before Salesforce DX and Git deployments, reducing release rework by 18%.

AI-Driven Case Triage & Resolution System ↗ | *Agentforce, Data Cloud, Einstein Trust Layer, REST APIs*

- Built an Agentforce case triage system to sort cases by intent and urgency. Added Einstein Trust Layer controls to protect sensitive customer data.
- Pulled CRM context from Data Cloud through REST APIs and showed case recommendations in a custom LWC. Cut average handling time by 24%.

Service Case Automation & Support Console ↗ | *Platform Events, REST APIs, Named Credentials, Salesforce DX*

- Built a case console using LWC, Apex, SOQL, and Flows to create, route, update, and escalate support cases. Reduced manual case review steps by 31.2% in test scenarios.
- Added SLA routing, REST API status lookup, and integration logs using Custom Metadata, Platform Events, Batch Apex, Queueable Apex, Named Credentials, and OAuth. Cut overdue case follow up time by 22%.

Education

Master of Science in Computer Science

Indiana University Bloomington

Aug 2024 - May 2026

Bloomington, IN, USA

Certifications

- Salesforce Certified Platform Developer I
- Salesforce Certified Platform App Builder
- Salesforce Certified Platform Administrator
- Salesforce Certified Agentforce Specialist
